

Adobe® LiveCycle™ Barcoded Forms 7.0 for Ascent Capture®

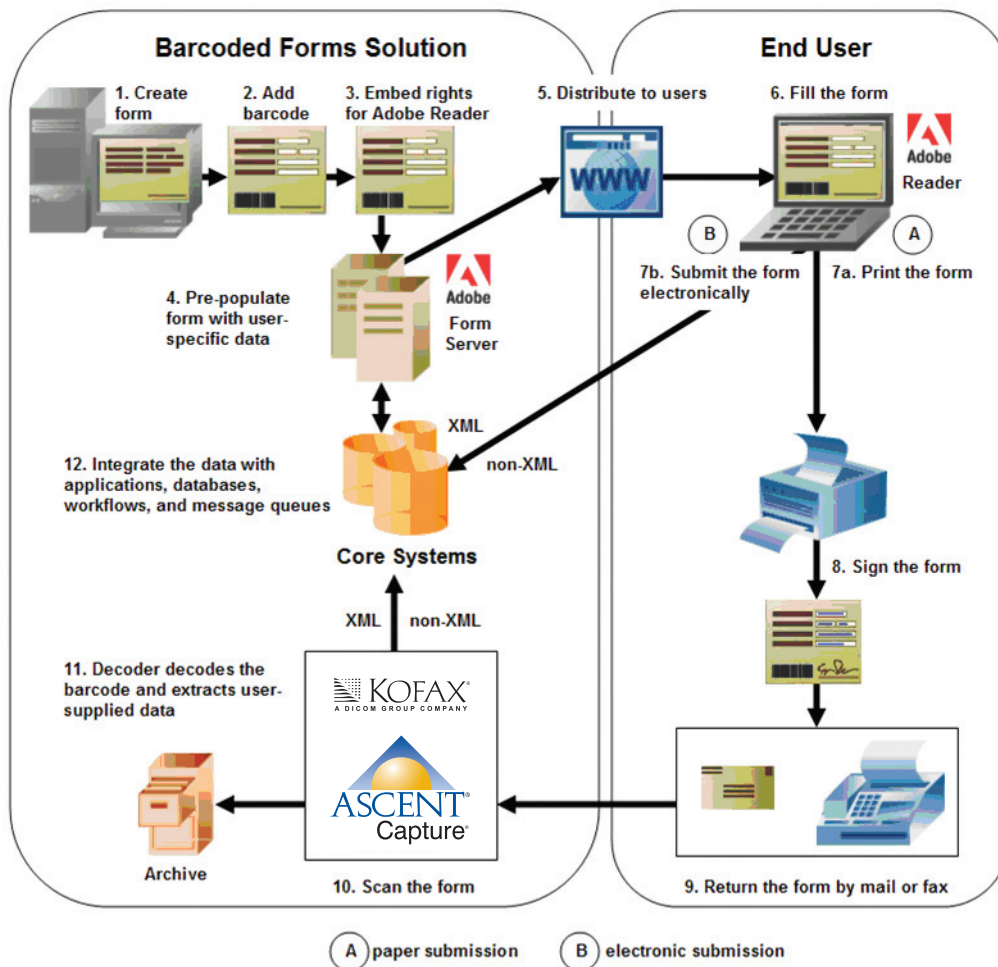

Kofax and Adobe Deliver Paper to Digital Forms Solution

Paper-intensive organizations always look for ways to reduce the labor and financial costs associated with managing large volumes of printed forms and documents. One option is to convert from a paper-based operation to an automated, electronic-based system. While this may sound good in theory, the transition to an electronic workflow is easier said than done. For example, electronic forms still may need to be printed to capture a "wet signature" for archival or review processes. Additionally, the need still exists to capture supporting attachments only available in a paper format.

Kofax helps you bridge the gap between paper and electronic forms with a solution that supports capturing the paper component of an electronic forms process. Adobe LiveCycle Barcoded Forms for Ascent Capture eases the transition to online forms for transactions such as applications, requests for information, authorizations, etc.

Bar code technology with PDF provides a unique alternative

Adobe LiveCycle Barcoded Forms for Ascent Capture automates the capture of user-supplied data from "fill-and-print" Adobe PDF forms using proven 2D (two-dimensional) barcode technology. In conjunction with Ascent Capture, when the barcode is successfully scanned, data is extracted with 100 percent accuracy and routed to enterprise business applications. This joint solution enables organizations to streamline paper-based and online business processes and significantly reduce errors, time and overall costs associated with manually re-keying data from paper forms.

Bridging the gap between paper and digital processes by providing an evolutionary path to electronic forms processing

The process of capturing data from paper forms is costly and error prone

In the U.S. alone, organizations spend \$15-20 billion per year on manual data entry. Industry studies show that anywhere from 2-7% of data is incorrectly keyed during this initial manual entry process. On a per-form basis, organizations typically spend anywhere from \$0.50 to \$5.00 on direct labor costs to capture data forms domestically. Optical Character Recognition (OCR) techniques that automate the capture of data from forms can dramatically reduce the cost and errors when processing forms. The Adobe LiveCycle Barcoded Forms for Ascent Capture solution offers a way to further reduce costs and eliminate errors when business processes must include printing of online forms for final processing.

A solution for paper and digital forms based processes

Form designers can create one interactive Adobe PDF form, which end users can fill online using the free Adobe Reader and return electronically or by paper. In addition, organizations can utilize a single solution for both paper and electronic forms to reduce integration costs and provide faster customer service. Now organizations can accelerate the flow of mission-critical information among employees, customers and suppliers, regardless of whether the workflow is electronic or paper-based.

Why Kofax for Production Information Capture Needs?

A Single Solution for Information Capture

Kofax is focused on the first and most vital step in information management: consistently capturing the various types of data that exist throughout your organization, in the highest quality possible, and indexing it all so you can easily find it again. Whether your information is on paper or in electronic files, whether it is parked at a central office or scattered on desktops and remote offices throughout the world, Kofax can help you capture it all quickly and accurately. Ascent Capture accelerates business processes by collecting paper documents, forms and e-documents, transforming them into accurate, retrievable information, and delivering it all into your business applications and databases. It offers unmatched compatibility with scanners and other capture devices, plus content and document management systems, workflow applications and databases. No matter what hardware or enterprise applications you choose now or in the future, you can count on Ascent Capture to ensure consistent capture, indexing and validation of your important information.

Why Adobe for eForms Solutions?

Whatever your business, documents are critical. And nobody knows documents and how people use them like Adobe. Centered on the Adobe® Intelligent Document Platform, solutions from Adobe and its partners improve the way customers and employees interact with information and with each other. Important data is secured and intuitively travels when and where it's needed. Processes are integrated and streamlined. Complexity is replaced with automated processes that enable your enterprise to meet its goals. And, documents become smarter and infinitely more useful — within and beyond corporate borders.
